## PROFESSIONAL PROFILE

Information Architect with 14+ years of experience designing scalable documentation systems for complex platforms, including infrastructure, distributed systems, and network-aware applications. Expertise in DITA, Markdown, LaTeX, and Git-based workflows, with strong experience translating complex engineering concepts into structured, user-centric documentation. Currently expanding domain expertise in Complex Systems & Infrastructure, industrial networking, and communication protocols.

## EXPERIENCE HIGHLIGHTS

### Engineering Documentation & Infrastructure

Aquera

Information Architect

Documented system architectures and integration workflows for complex distributed platforms, aligning with infrastructure and network-based systems. Collaborated with engineers to translate backend systems, APIs, and infrastructure components into structured documentation.

### System Architecture & Documentation Strategy

Samsung / Eclipse

Information Architect

Designed task-based navigation and metadata strategy for large-scale engineering environments. Created visual representations of system workflows, architecture interactions, and cross-platform integrations to reduce user friction.

### Docs-as-Code Portfolio

Docusaurus + Automation

Technical Lead

Developed a production-ready documentation site with PR-based updates, automated builds, and GitHub Pages deployment, supporting scalable, modular content similar to industrial environments.

## INDUSTRIAL & NETWORKING

- Complex Systems & Infrastructure
- Industrial Protocols (Modbus, OPC)
- TCP/IP, VLANs, VPNs, IP Routing
- System Architecture & Topology
- Distributed Systems Workflows
- Infrastructure Awareness
- Real-Time & Data Acquisition
- Cross-System Communication

## TECHNICAL EXPERTISE

### DOCUMENTATION ARCHITECTURES

- System Architecture Layouts
- Network Topology Visualization
- API Strategy (REST, OpenAPI)
- Installation & Operational Docs
- Security & Access Control

### TOOLS & DELIVERY

- Git, GitHub, CI/CD Pipelines
- AI Agentic Tooling & Automation
- Visio, Miro, Network Diagrams
- XML/DITA, Markdown, LaTeX
- Docusaurus, React, Node.js
